EPW – End Seal Paint (Wax base)

Paint for the cut ends of dimensional lumber and wood composites

DESCRIPTION
Willamette Valley Company has formulated a waterborne paint with a paraffin base, specifically designed for use on dimensional and wood composites. EPW (Edge Paint Wax) has been developed to give the cut end of dimensional lumber and wood composites the protection and beauty that the mill’s and customer’s demand. Paraffin base paints will give excellent moisture protection.

WHERE TO USE
- Dimensional Lumber
- LVL, Plywood, OSB
- Industrial Mills and Plants

FEATURES AND BENEFITS
- Excellent Moisture Protection
- Increases Wood Shelf Life
- Vibrant Colors Attract Customers
- Available in a Variety of Colors
- Helps Prevent Checking

APPLICATION
Apply one coat of EPW, as supplied by airless spray, brush or rolling at a wet film thickness of 4-5 mils. For porous wood or higher performance, increased film thickness is advised. For other types of application methods check with your Willamette Valley Company representative for directions and recommendation for use. Stenciling and any recoating should be done before the paint has dried completely and formed an impervious film.

CLEAN-UP
Clean equipment before paint dries completely. If the paint has dried, hot water, detergent and scrubbing will be required.
