APPLICATION
Please contact your Willamette Valley Company representative for determining the suitability of Wil-Jet A in your application system.

CLEAN-UP
Wil-Jet A can be cleaned with acetone prior to the ink drying. If the coating has dried it may respond to acetone clean-up but may need to be mechanically removed.

NOTES
This product is supplied to the customer in a ready-to-use form. Do not dilute the product as that will compromise the strength of the ink and could lead to poor quality printing.

When changing over to Wil-Jet A ink it is recommended that the application system be thoroughly cleaned and free of the previous ink. Cleaning should include the printing heads, filters, intermediate tanks and tubing. It is recommended to change the filter as part of the pre-start-up preparation.
HEALTH AND SAFETY

Before handling, you should become familiar with the Safety Data Sheet (SDS) regarding the risks and safe use of this product. To obtain an SDS please call 800-333-9826 or send an email to: sds@wilvaco.com.
