LVL STRUCTURE-SEAL (F)

Water-based Sealer for Engineered Wood Products

DESCRIPTION
LVL Structure-Seal (F) is a water-based sealer formulated specifically for Engineered Wood Products such as LVL, dimensional lumber, treated lumber, and plywood. It is a low viscosity, high-penetrating surface treatment that minimizes checking, splitting and moisture damage for both softwood and hardwood substrates. LVL Structure-Seal (F) provides excellent water repellency and a higher moisture barrier property than regular wax emulsion-based sealers. LVL Structure-Seal (F) is an economical and environmentally friendly product.

WHERE TO USE
- Engineered Wood – LVL and Plywood
- Dimensional & Treated Lumber
- Lumber Mills and Plywood Plants

FEATURES AND BENEFITS
- Sprays Well Through Airless & Air-Assisted Pumps
- Smooth Application
- Environmentally Safe
- Excellent Water Repellency
- Limited Exterior Durability

PACKAGING
- 5-gallon pails
- Drums
- Totes
- Tank Truck

SHELF LIFE
6 months when properly stored, occasional stirring is required to prevent colorant settling.

STORAGE
Store this product in a clean, dry, shaded or covered environment. DO NOT FREEZE.

APPLICATION
LVL Structure-Seal (F) is designed to work in many delivery systems, including: airless and air-assisted spray systems or brush coating systems. Your Willamette Valley Company representative can advise you as to which product is best for your system.

After application of this material, dry the lumber thoroughly using ambient air or an in-line dryer before stacking. Dry time depends on temperature, humidity and thickness of film.

CLEAN-UP
Clean equipment and containers immediately with hot soapy water.
NOTES
This product is supplied to the customer in a ready to use form. Any addition of water to reduce viscosity may result in degradation of the product performance.
