MIC – Moisture Indicator Ink

Moisture Indicator Ink - Concentrate

DESCRIPTION
Moisture Indicator Ink (MIC) is a concentrated ink designed to be used with dryers in mills using moisture meters to mark wet veneer. When the detector senses a wet veneer, the ink is sprayed on the veneer to mark it in a bright color to alert the operator that the veneer is still too wet to go further in the process. Usually the operator will then send the veneer back through the dryer system.

WHERE TO USE
- Veneer Plant Moisture Meters
- Plywood Plants

FEATURES AND BENEFITS
- Easy-to-see bright colors
- Water-based
- Various concentrate levels

PACKAGING
1-gallon pails
5-gallon pails
Drums
Totes

SHELF LIFE
6 months when properly stored.

STORAGE
Store this product in a clean, dry, shaded or covered environment out of direct sun light.

DO NOT FREEZE – Store at 38-100°F (3.33-37.7°C)

APPLICATION

This product is supplied to the customer in a concentrated form. It is intended to be diluted to 30:1. Additional dilution may result in degradation of the product performance.

Moisture Indicator Ink is used in a moisture meter detector and can be used in a hand-held Sure Shot sprayer. For other recommendations, please contact your WVCO representative.
USE

MIC is used in an automated moisture meter that sprays it onto veneer determined to be wet. This indicates to the veneer puller that the veneer needs to be sent back through the drier.

CLEAN-UP

MIC must be washed with warm soapy water while still wet.

CONTACT INFORMATION
