**WV WAX SW-4950**

Experimental Slack Wax for OSB

**DESCRIPTION**
Willamette Valley Company has formulated a slack wax product for use in OSB panel production that is designed to reduce thickness swell as well as water absorption properties.

**WHERE TO USE**
- OSB, OSL, Particleboard, and MDF
- Industrial Mills and Plants

**FEATURES AND BENEFITS**
- Reduced Thickness Swell
- Reduced Water Absorption
- Lubricates Flakes for More Efficient Resin Transfer

**PACKAGING**
- 1-Gal. Samples
- Heated Tanker Truck
- Rail Car

**SHELF LIFE**
Indefinite as solid

**STORAGE**
Maintain temperatures between 160°F – 180°F. If allowed to cool and solidify, apply heat until molten.

**TECHNICAL INFORMATION**

**APPLICATION**
Ensure WV WAX SW-4950 is fully melted and maintain temperature between 160°F – 180°F. Apply to blender and furnish in molten state through air nozzles or spin disk atomizers between 1 – 3 % in relation to dry wood mass depending on performance needs.

**CLEAN-UP**
Clean-up is simple and requires hot water, detergent and scrubbing.

**NOTES**
This product may be supplied as a solid or in a molten state. Regardless of how it is received, to be used, the material needs to be molten (between 160°F – 180°F).
HEALTH AND SAFETY

Before handling, you should become familiar with the Safety Data Sheet (SDS) regarding the risks and safe use of this product. To obtain an SDS please call 800-333-9826 or send an email to: sds@wilvaco.com.
