POLYQuik® P-150
Polyurea Repair Kit

DESCRIPTION
POLYQuik® P-150 is a two-component, 100% solids polyurea patch/repair kit. It is packaged in foil pouches and designed to be brush or roller applied to repair various POLYQuik® spray applied elastomeric coatings (POLYQuik® P-480) in the field or other scenarios where spraying is not feasible.

WHERE TO USE
- POLYQuik® Polyurea coated substrates
- Steel and concrete
- Field repair for pinholes, holidays, other damaged areas

FEATURES AND BENEFITS
- Rapid Cure - fast return to service
- 100% Solids, No Odor, Environmentally Friendly
- Excellent Adhesion
- Manually Applied – no spray equipment required

PACKAGING
1-pint (0.5L) kit – convenient foil pouches

COLORS
Black

SHELF LIFE
1 year when properly stored.

STORAGE
Store and ship this product in clean, dry, low-humidity and shaded or covered environments between 50 and 90°F (10-32°C)

POLYQuik® Primers Installation Guideline

1) Clean substrate by solvent wiping with acetone or denatured alcohol.
2) Abrace polyurea by sanding or grinding. Repeat solvent wipe cleaning.
3) For concrete, remove all laitance, efflorescence and other imperfections. Repair surface defects with appropriate material and allow to cure per manufacturer’s instructions.
4) For steel, remove all loose rust, scale and stains by blasting, grinding or brushing.
5) Prime when necessary. Follow manufacturer's instructions for use.
6) Mix POLYQuik® P-150 components manually for 30 seconds at 1:1 volume ratio. Material has ~5 minutes working time, so mix no more material than can be applied in that window.
7) Apply with brush or roller immediately after mixing. Cover the substrate evenly.
8) If material becomes stiff during application, stop application and discard unused material. Mix new material to continue.
9) Allow at least 1 hour at 70°F (21°C) for cure. Cold temperatures require longer cure times. Full properties require at least 24 hours to develop.

For primer application please refer to: POLYQuik® Primers Installation Guideline

-Recommended POLYQuik® P-150 application thickness is 40-100 mil per coat.

-Optimum recoat time is ≤8 hours at 70°F.

-Estimated Quart Kit coverage rate is 2 ft² (0.19 m²) at 100 mil WFT.

-Maximum recommended contiguous repair area is 2 ft².

HEALTH AND SAFETY

Before handling, you should become familiar with the Safety Data Sheet (SDS) regarding the risks and safe use of this product. To obtain an SDS, please call 800-333-9826 or send an email to: sds@wilvaco.com.

DISCLAIMER OF WARRANTY

TEST RESULTS ARE TO BE CONSIDERED AS REPRESENTATIVE OF CURRENT PRODUCTION AND SHOULD NOT BE TREATED AS SPECIFICATIONS. WHILE ALL THE INFORMATION PRESENTED IN THIS DOCUMENT IS BELIEVED TO BE RELIABLE AND TO REPRESENT THE BEST AVAILABLE DATA ON THESE PRODUCTS, NO GUARANTEE, WARRANTY, OR REPRESENTATION IS MADE, INTENDED, OR IMPLIED AS TO THE ACCURACY OR SUFITNESS OF ANY INFORMATION OR TO THE SUITABILITY OF ANY CHEMICAL COMPOUNDS FOR ANY PARTICULAR USE, OR THAT ANY CHEMICAL COMPOUNDS OR USE THEREOF ARE NOT SUBJECT TO A CLAIM BY A THIRD PARTY FOR INFRINGEMENT OF ANY PATENT OR OTHER INTELLECTUAL PROPERTY RIGHT. EACH USER SHOULD CONDUCT A SUFFICIENT INVESTIGATION TO ESTABLISH THE SUITABILITY OF ANY PRODUCT FOR ITS INTENDED USE. PROPER APPLICATION IS THE RESPONSIBILITY OF THE USER. AS WITH ANY PRODUCT THE USE OF THE THIS PRODUCT IN A GIVEN APPLICATION MUST BE TESTED (INCLUDING BUT NOT LIMITED TO FIELD TESTING) IN ADVANCE BY THE USER TO DETERMINE SUITABILITY. TESTING IS THE REQUIREMENT OF BOTH ENGINEERS AND CONTRACTORS ALIKE. WILCO DOES NOT WARRANT THE APPLICATION UNDER ANY OR ALL CIRCUMSTANCES.
