APPLICATION

Apply one coat of Wil-Coat Edge, as supplied by airless spray, brush or rolling at a wet film thickness of 4-6 wet mils. For porous wood or higher performance, increased film thickness is advised. For other types of application methods check with your Willamette Valley Company representative for directions and recommendation for use. Stenciling and any recoating should be done before the paint has dried completely and formed an impervious film.

CLEAN-UP

Clean equipment before paint dries completely. If the paint has dried, hot water, detergent and scrubbing will be required.

NOTES

This product is supplied to the customer in a ready to use form. Any addition of water to reduce viscosity may result in degradation of the product performance.
