Wil-Seal Black
Plywood and OSB Sealer

DESCRIPTION
Willamette Valley Company has formulated a waterbased, styrene-acrylic coating that protects plywood and OSB panels from moisture degradation. The coating helps maintain the integrity of the panels used in the manufacture of recreational vehicles, pre-fab homes and trailers. Wil-Seal coating is manufactured in black but any color is possible if desired. Wil-Seal can be sprayed with many conventional paint spraying systems. If the typical viscosity does not fit the spray equipment that is available a custom viscosity is possible.

WHERE TO USE
- Manufacturer of trailers and recreational vehicles
- Builders of prefab homes
- Any manufacturer that requires wood panel to be weather resistant.

FEATURES AND BENEFITS
- Excellent Moisture Protection
- Increases Useful Life
- Custom colors can be formulated upon request

PACKAGING
- 5-gallon pails
- Drums
- Totes

SHELF LIFE
- 6 to 9 months when properly stored.

STORAGE
- Store this product in a clean, dry, shaded or covered environment above 45°F (7.2°C). DO NOT FREEZE.

APPLICATION
Apply one coat of Wil-Seal, as supplied by airless spray, brush or rolling at a wet film thickness of 4-6 wet mils. For porous wood or higher performance, increased film thickness is advised. For other types of application methods check with your Willamette Valley Company representative for directions and recommendations for use.

CLEAN-UP
Clean equipment before paint dries completely. If the paint has dried, hot water, detergent and scrubbing will be required.

NOTES
This product is supplied to the customer in a ready-to-use form. Any addition of water to reduce viscosity may result in degradation of the product performance.
HEALTH AND SAFETY

Before handling, you should become familiar with the Material Safety Data Sheet (MSDS) regarding the risks and safe use of this product. To obtain an MSDS please call 800 333 9826 or send an email to: msds@wilvaco.com.
